

Resume of Norman H. Strassner

UI/UX/HCI and Media Professional

Email: norm@strassner.com

<https://www.StunningUIs.com>

My objective is to continue using my extensive knowledge and experience in enterprise-level user interface and website, web applications, and content design and creation to produce exciting user experiences, and explore and develop new markets and improved methods of content delivery and communication while being entertaining and informative.

Strengths

- Passion, creativity, time-based completion of tasks.
- Construct artistically pleasant, practical solutions to difficult problems.
- Coordination of people and workflow.
- Strong ability to see the forest through the trees.
- Experienced in Confluence, Jira, GIT, etc.
- Experienced in PC, Mac and Linux environments.

Professional Experience:

Tactis/Peraton/Space Force/Air Force

9/2022 – 7/2023

UI/UX Contractor

- Hired by Tactis, contracted out as a contract consultant to Peraton.
- Successfully designed, created, and tested software applications for the United States Air Force and the United States Space Force.
- Applications created for classified and unclassified reporting of anomalous situations that could affect our commercial and military satellite vehicles.

United States Department of Agriculture (USDA)

11/2021 – 2/2022

Part Time, Short Contract Consultant: UI/UX Specialist (via Ace Info Solutions)

- Tasked with helping to evaluate whether ten-year-old USDA APHIS field applications require redesign.
- Interviewed users and stakeholders to determine weak points of existing software.
- Evaluated Web based and Mobile based APHIS software.
- Provided in depth briefs and reports detailing UX weaknesses and strengths.

The three companies, below, were start-ups that I took a chance on, but they ran out of money.

Quarter, Inc, Niwot, CO

4/2020 – 6/2021

UI/UX specialist, Website Designer, Video producer

Note: This was a start-up company that ran out of money.

- Designed and implemented secure web application, using NodeJS and Aurelia, to retrieve personal financial data in a secure environment.
- Developed corporate website.
- Produced several videos for website

Strassner Media, LLC, Erie, CO

4/2019 – 4/2020

UI/UX Consultant and Full Stack Programmer

Note: This is my own company

- Providing guidance to mid-sized corporations in the design of their web presence and complex web applications.
- Designing and programming sites in Drupal CMS, Versions 7, 8 and 9.
- Designing web applications, public and private facing

Capitalize Network/Dealware, Louisville, CO

4/2018 – 8/2019

Senior Programmer

Note: This was another start-up company that ran out of money.

- Designed and created multiple, complex web apps and front ends for secure document processing backend, including data input and output remediation, using Aurelia, Node.js, among other high level tools.
- Utilized NodeJS/Aurelia/Javascript/jQuery to securely access documents Java backend for storage and secure sharing.
- Local coding on PC and Mac, remote builds and code management on Linux back-end.
- Worked in AGILE environment.

Sequence Logic, Longmont, CO

9/2016 – 4/2018

Senior Programmer/UI/UX

Note: This was a third start-up company that ran out of money.

- Designed and created multiple, complex web apps and front ends for secure document processing backend, including data input and output remediation, using a combination of plain Javascript, jQuery, AJAX and JSP/HTML/CSS.
- Used Balsamiq on-line software to create/modify wireframes for all web applications.
- Utilized Javascript/jQuery access documents and graphics in a secure environment from a Java backend for remediation.
- Devised software APIs to use HTML5 graphics solutions to outline sections of data on images from bounds definitions so that the OCR'd data can be changed or verified.
- Worked alongside and consulted quality assurance team to product acceptable designs.
- Local coding on PC and Mac, remote builds and code management on Linux back-end.
- Worked in AGILE environment.

Aljex Software

1/2015– 9/2016

Programmer/Designer

Left Aljex to work with start-up companies

- Created and maintained custom SAAS (Software as a Service) systems and trucking logistics software using a proprietary database system and Javascript/jQuery/HTML/CSS/PHP.
- Built backend custom REST API integrations in Python and PHP for 3rd party integrations for Pepsico and NFI.
- Built front-end applications in Javascript/jQuery to alter/improve client user experiences.
- Add new functionality to existing trucking applications.
- Created new trucking applications, including worldwide, real-time container tracking/polling.

Web Development Architect / Drupal SME

- Design, construct, program, and maintain websites and e-commerce shopping carts for businesses of varying sizes with complex web development needs.
- Created original themes for Drupal and Wordpress utilizing using HTML (5), CSS (3), PHP, JavaScript, JQuery, AJAX, etc.
- Authored a number of custom modules to add functionality such as:
 - Custom database queries and views.
 - Transactional communication between web server and mobile apps.
 - Created custom, additional databases and custom code for added Drupal functionality.
 - Created method by which remote installations of proprietary software talked with web server for installation permissions and error reporting.
 - Created custom paging and search engines.
 - Created e-commerce solutions for custom shopping carts, video-on-demand, and recurring payments.
- Added internationalization (multilingual capabilities) to websites.
- Created JSON feed APIs.
- Developed software using C++, C#, My SQL, LAMP, WAMP, etc.

Videomedia, Inc.

2/1995 – 8/2006

Broadcast Application Software Engineer

- Led 5-member development team in remote locations.
- Designed complex editing and edit decision list management software for television and the web.
- Utilized Borland C++ to create multiple Windows applications for video editing and effects.
- Created machine control software and front ends for automatic ad insertion for local television stations.
- Created custom on-screen controls in support of Videomedia Software.
